

ICCM Training – Basic Skills Development

ICCM Training believes that support workers, health care assistants and their management should be trained and updated on good practice and basic skills. ICCM training believes these building blocks include regulatory requirements and basic care knowledge and techniques. These include -

Basic Skills Course

- **Health & Safety**
- **Moving & Handling**
- **Food Hygiene & Infection Control**
- **Responsible Person First Aid**
- **Safeguarding Adults**
- **Communication & Record Keeping**
- **Medication Management**

- Course structure involves multi-media presentations, individual/group participation and handouts.
- Mandatory courses on basic skills are ½ day courses, enabling attendees to complete 2 regulatory/good practice programmes in a single day
- All ICC Trainers have a background as health and social care practitioners.
- Courses can be provided on-site
- All courses have full certification for attendees.
