- Course duration is from 2 to 6 hours, dependent upon the course complexity, level of skill required.
- Some courses with a broad scope contain abridged versions of other programmes –
e.g. Head Injury programmes include components on Epilepsy Management, Behavioural Principles, Language Disorders. Spinal Cord Injury Training includes Skin Care, Bowel Management, etc.
- Refresher courses on all of these topics are available.
- Courses can be designed to comply with individual organisation's characteristics, or, specific client group needs.
- All ICCM Trainers have extensive experience as health and social care practitioners.
- Courses are constructed with an emphasis on delivering practical techniques, within good practice criteria.
- All courses have concise handouts and attendees receive certification.
